

AIQxQIA 2026 — Paper 14 Camera-Ready

To-do list for Monday, 5 October 2026

Piero Giacomelli

Prepared 4 October 2026

Paper: *p-adic Variational Quantum Circuits Have No Barren Plateaus* (EasyChair id 14).

Source of these instructions: email “AIQxQIA 2026 – Camera-ready instructions” from `aiqxqia2026@easychair.org`, 14 September 2026. Angelo Oddi pointed back to the same email on 30 September.

Working folder: `papers/aiqxqia2026/paper14-camera-ready/`

Status as of 4 October

- ✓ `ceurart` one-column template.
- ✓ Title in capitalized style.
- ✓ `\copyrightyear{2026}` and the CC BY 4.0 `\copyrightclause` match the email.
- ✓ `\conference{...}` footnote matches the email word for word.
- ✓ `paper14-camera-ready.zip` holds the sources, `.bbl`, `class`, `style` and final `main.pdf`, and rebuilds from a clean extract.
- × **The signed copyright form is missing.** This is the only thing blocking the upload.
- × Nothing has been uploaded to SharePoint yet.
- × The AIxIA 2026 registration payment is still pending (membership order, then the green form).

Step 1 — Fill in the copyright form (NTP variant)

Use the **NTP** form, because the paper contains no third-party material: `ceur-author-agreement-ccby-ntp.pdf`, already in the working folder (version 1.08-ntp, 2026-09-03). Fill in *every* field.

- ☐ **Contribution title:** *p-adic Variational Quantum Circuits Have No Barren Plateaus*
- ☐ **Authored by:** Piero Giacomelli
- ☐ **Corresponding author name:** Piero Giacomelli
- ☐ **Address:** fill in by hand
- ☐ **Affiliation:** Tenax SPA, Verona, Italy
- ☐ **Email:** `pgiacome@gmail.com`
- ☐ **Name and year of the event:** AIQxQIA 2026: 4th International Workshop on AI for Quantum and Quantum for AI

- ☐ **Editors of the proceedings:** Miguel Angel Gonzalez, Corrado Loglisci, Angelo Oddi, Riccardo Rasconi, Ramiro Varela Arias

Step 2 — Sign it by hand and scan it

- ☐ Print the completed form.
- ☐ Sign it **with a pen**. **Do NOT sign it digitally** (no Adobe Reader signature).
- ☐ Scan the **entire page** to PDF.
- ☐ Save the scan as `paper14-camera-ready/copyright-form-signed.pdf`.
- ☐ Check that the scan is legible and that every field is filled in.

Step 3 — Rebuild the zip with the form included

The zip must contain the LaTeX sources with `main.tex` at the top level, the final PDF and the signed form. From the repository root:

```
cd papers/aixqia2026/paper14-camera-ready
rm -f paper14-camera-ready.zip
zip paper14-camera-ready.zip main.tex references.bib main.bbl \
    ceurart.cls elsarticle-num-names.bst cc-by.pdf main.pdf \
    copyright-form-signed.pdf
unzip -l paper14-camera-ready.zip      # expect 8 files
```

- ☐ Optional: extract the zip into a temporary folder, run `pdflatex main` there, and confirm it still builds.
- ☐ Do **not** add `main_20260926.tex`, the aux/log files or the blank form to the zip.

Step 4 — Upload to the organizers' SharePoint folder

- ☐ Open the SharePoint link in the 14 September email. It is left out of this file on purpose, because the repository is public.
- ☐ Open the subfolder **paper14**, or create it with exactly that name if it does not exist yet.
- ☐ Upload `paper14-camera-ready.zip`.
- ☐ Check that the upload finished and that the file size is about the same as the local zip.

Step 5 — Close the loop

- ☐ Optional but advisable: send a short email to Riccardo Rasconi (riccardo.rasconi@istc.cnr.it), cc Angelo Oddi, saying that the paper 14 camera-ready and signed form are uploaded. The original call for papers also asked for the signed agreement to be sent to Rasconi.
- ☐ Finish the AIxIA 2026 registration. Pay the membership order under “Orders” on aixia.it, then submit the green form at <https://aixia.it/green2026-eng/>. If the order still has not arrived, register on site in Perugia, as agreed with Angelo Oddi.

- Nothing to commit: `copyright-form-signed.pdf` and `paper14-camera-ready.zip` are both gitignored, because the repository is public and the scan carries your handwritten signature and address. Keep them local.

Coming up

Talk on **8 October 2026** (15–20 minutes). The slides are in `papers/aiqxqia2026/talk/`.
